

XTE™ Unify

Automated Performance
Evaluation of X-Ray/CT Scanners
Onsite or Centralized Monitoring

XTE-Unify software is designed to connect to X-ray scanners, to analyze XTE image data from scanners, and to generate automated test reports for use in system characterization and quality assurance.

- Software update, license management and cloud services communication
- Scanner connection, XTE data processing and XTE data analysis
- User interface management and rendering

Dimensions: Console 10.1" touch pad

Worldwide customers in Australia, US, EU, and Thailand and Singapore from OEM scanner vendors, air freight centres (UPS/FEDEX), and NGOs like World Custom Organization (WCO).

Designed, Engineered, & Manufactured by Synergy4Tech Pte Ltd
Distributed in the United States by KHLG & Associates, Inc.
